

COVID-19 Cleaning & Disinfecting

COVID-19 is caused by a virus (SARS-CoV-2) that is part of a large family of viruses called coronaviruses. This contagious virus can be killed by thorough cleaning with disinfecting solutions.

Because the safety and health of our employees and clients are paramount to us, Alpine is offering cleaning and disinfecting services to combat this growing threat. We use EPA-registered disinfectants, including a botanical option for sensitive environments.

We've performed comprehensive and meticulous environmental cleaning for 30 years to remove toxic lead dust, mold spores and asbestos fibers. This experience means our teams are trained and highly qualified to clean and disinfect your indoor spaces, making it possible for you and your fellow residents or coworkers to safely return to your home or facility.

Cleaning & Disinfecting Procedure

Step 1 |

Prior to entering the space to clean and disinfect, all employees put on Personal Protective Equipment – full-face HEPA respirator, Tyvek suits, and disposable gloves. This protects both them and you from potential exposure.

Step 2 |

EPA-registered disinfectants are applied to potentially contaminated surfaces.

Step 3 |

All generated materials are safely removed and disposed of in accordance with federal, state, and local regulations.
